

# Applied Digital Skills

Prepare your students for life in and out of the classroom

## Free Professional Development

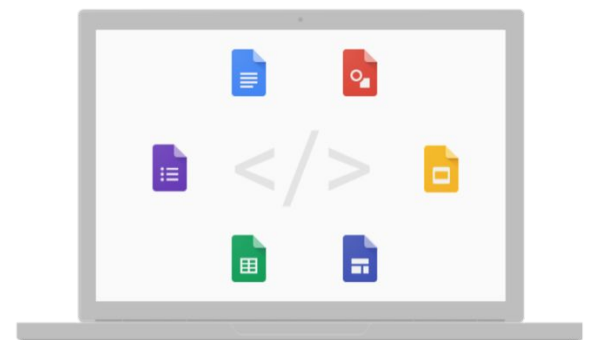

Join Kiker Learning to learn how you can use the free [Applied Digital Skills G Suite curriculum](#) to help your students develop critical, job-ready digital skills that meet state standards.

In this hands-on training, we'll walk through lessons with tangible outcomes:

- **Introduction to the curriculum and deep dive into units.** You will get expert-led training that takes you through the curriculum and its blended learning format.
- **Hands-on time.** You will have hands-on time where you pretend to be a student using the curriculum, and create your first class as a teacher.
- **Brainstorm uses.** You will brainstorm with experts and your colleagues on ways to integrate the curriculum into your classroom to maximize your students' learning outcomes.

Join Us for a Day of Learning  
December 8th, 2018 9am-12pm  
Burlington County  
Education Association ([map](#))

All educators are invited to join us! We've seen the curriculum used in everything from culinary arts classes to science and technology classes and recommend it for grades 5+. We are so excited to provide your district with this limited time, pilot PD opportunity, and welcome all educators.
